ABOUT US

Differential advantage

Resify streamlines the immigration process for international students via our automated digital solution, resulting in increased approval ratings and enhanced student support.

The traditional immigration journey is highly manual, fragmented, and underserved, with newcomers often feeling isolated and alone throughout the process. Thus, we present four essential advantages over our competitors:

1. **Efficiency:** Within minutes, users can determine the specific immigration procedure, visa, or residence permit they need by completing a straightforward questionnaire. They'll promptly receive a list of required documentation, enabling them to start uploading it to their user area without delay.
2. **Cost:** as a result, management costs are considerably reduced with respect to conventional processing, saving the user the usual fees for consultation with a lawyer or advisor.
3. **Convenience:** the user does not need to travel or make an appointment, with the difficulty that this entails, taking into account that in many cases, these procedures must be initiated from the country of origin.
4. **Transparency:** both in prices (the total amount is known from the beginning) and in the status of the process (you can check the status in real time).

PROFESSIONAL ADVICE

We are expert immigration lawyers, with extensive experience in immigration law.

We are familiar with the practical problems of time, money and travel involved in a migration.

As we are collaborators of the competent administrations, we can electronically submit applications and documentation, having access to preferential processing.

TECHNOLOGICAL EDGE

The questionnaire that instantly determines, according to the user's particular situation, the permit/visa to which he/she should apply to.

The user can immediately start the process, from your smartphone, computer or tablet.

Our platform allows you to scan and upload all the required documentation. This, after a review by experts in immigration law, is submitted directly to the Administration.

THE BEST SERVICE FOR THE CUSTOMER

Our system allows us to reduce costs as much as possible and thus offer the most competitive prices in the market.

We offer the convenience of carrying out all procedures without having to travel, avoiding waiting time to be attended.

As a result of all of the above, we achieve the maximum reduction of the processing time of each procedure, offering at the same time the best guarantees of success in the approval.
