Real-world casework

WINTER PROGRAMS

Housing and meals included

Jan 6-10

AI for Business

This program prepares leaders to harness AI technologies for business transformation, focusing on practical applications, regulatory challenges, and social impacts to navigate the evolving technological landscape.

Jan 6-10

Social Entrepreneurship

This program empowers aspiring founders to create ventures with societal and environmental impact. It covers key topics such as customer centricity and impact assessment, preparing leaders to innovate with purpose.

Jan 13-17

Personal Finance and Investing

This program offers an in-depth introduction to key financial concepts, including budgeting, saving for retirement, taxes, and investing, with a strong focus on practical, real-world applications.

SUMMER PROGRAMS

Housing and meals included

May 27-June 6

July 7-18

Fundamentals of Corporate Finance and Valuation

This program teaches core finance concepts through a case-driven curriculum, with topics covering financial analysis, capital structure, valuation, and mergers and acquisitions.

May 27-June 6

AI for Business (Extended)

This extended program, which explores AI technologies, includes content similar to the winter program but offers more hands-on work, deeper exploration of AI tools, and a more demanding capstone project.

June 9-20

Social Entrepreneurship (Extended)

This extended program, which focuses on creating ventures with societal and environmental impact, includes content similar to the winter program but offers more hands-on experience and a more rigorous final project.
